

Tungsten Steel Round Knife 240mm For Paper Film Conversion Rewinding Machine

Our Product Introduction

for more products please visit us on blade-industrial.com

Basic Information

- Place of Origin: China
- Brand Name: Seton
- Certification: CE ISO
- Model Number: Tungsten Steel
- Minimum Order Quantity: MOQ 10 Pieces
- Price: Can be discussed
- Packaging Details: 1pc/wrapper, 100pcs/box, 100boxes/ctn, Wooden and carbon boxes
- Delivery Time: 30 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 500 Piece/Pieces per Day

Product Specification

- Product Name: Tungsten Steel Round Knife
- Material: Tungsten Steel
- Precision: 0.01-0.05mm
- Hardness: HRC 52 - 65
- Outer Diameter: 240mm
- Thickness: 3mm
- Inner Diameter: 100mm
- Applicable Industries: Manufacturing Plant
- Highlight: tungsten steel round knife, steel round knife 240mm, tungsten saw blade round

Product Description

Tungsten Steel Round Knife For Paper Film Conversion Rewinding Machine

Description:

Here are the key points to consider when using circular blades:

1,Safety Operation:

Carefully read the product instructions before use to understand the proper usage methods.
Always keep your hands away from the blade edge and be cautious during the cutting process.
Maintain a stable posture while cutting to avoid hand trembling or slipping.
If the blade is damaged or deformed, stop using it immediately and replace with a new one.

2,Blade Maintenance:

Regularly check the blade for dullness and promptly sharpen or replace it as needed.
Clean and store the blade according to the product guidelines to prevent rusting or damage.
Be extra careful when cutting hard materials, as it can accelerate blade wear.

3,Appropriate Usage:

Select the blade model and size that matches the cutting material and thickness.
Do not attempt to cut beyond the blade's capacity, as it may damage the tool.
For precise cutting tasks, consider using professional-grade circular blades.

4,Protective Measures:

Wear personal protective equipment such as gloves and safety glasses during use.
Keep the work area clean and clear of children and pets.
Store the blade safely after use to prevent accidental injury.

5,Environmentally Friendly Disposal:

Dispose of worn-out blades properly according to local environmental regulations.
Choose reusable blade models to reduce waste.
Minimize material waste during the cutting process to protect the environment.

Rotary Slitter Blade Specifications:

Product Name	Tungsten Steel Round Knife
Material	Tungsten Steel
Precision	0.01-0.05mm
Hardness	HRC 52 - 65
Outer Diameter	240mm
Thickness	3mm
Inner Diameter	100mm
Applicable Industries	Manufacturing Plant

Here are some tips for properly storing and maintaining circular blades to extend their lifespan:

1,Cleaning and Lubrication:

After each use, clean the blade with a soft cloth to remove any dirt, debris or residue.
Apply a light coating of blade oil or lubricant to the blade surface to prevent rust and corrosion.
Wipe off any excess oil to avoid attracting dirt and dust.

2,Proper Storage:

Store the blades in a dry, cool place away from direct sunlight and moisture.
Keep them in a protective case or sleeve to prevent nicks, scratches and damage to the blade edges.
Avoid storing blades loose in a drawer or toolbox where they can collide with other tools.

3,Sharpening and Honing:

Regularly sharpen the blades using a sharpening stone or electric sharpener.
Hone the blades periodically to maintain a keen, precise edge.
Follow the manufacturer's recommendations for the proper sharpening angle and technique.

4,Replacement:

Inspect the blades before each use for signs of wear, nicks, cracks or deformation.
Replace any damaged or excessively worn blades to avoid safety issues and poor cutting performance.
Use only replacement blades recommended by the original manufacturer.

5,Proper Usage:

Avoid using excessive force or putting the blade under too much stress during cutting.
Cut on appropriate, stable surfaces and do not force the blade through tough materials.
Use the right blade for the specific cutting task and material thickness.

Size:

70x10x1.0

80x40x1.0

68x16x4.0

68x19x4.0

Applications:

Our Factory:

Seton Blade----15 years of experience in the manufacture of industrial blades

Our mission is simple - make cutting effortless for our clients! To do this we ask questions about your specific application and then listen. Once we understand what you are trying to accomplish, we provide options that best meet your specific needs. we also provide extensive product and deep inventory..
